EDUCATION

B.Tech - Computer Science Engineering

Velagapudi Ramakrishna Siddhartha Engineering College
7.76 CGPA

2022 – Present | Vijayawada, India

SKILLS

Web-Technologies: HTML, CSS, React | **Programming Languages:** Java, Python, C, JavaScript | **Database:** PostgreSQL, MongoDB, Supabase, Firebase | **Tools:** VS Code, Git | **Frameworks:** Node.js, Express

PROFESSIONAL EXPERIENCE

Software Intern

04/2025 – Present | Remote

Pranayuv Technologies

- Prepared 5 responsive UI components using Next.js, Tailwind CSS, and Framer Motion, decreasing **page load times by 42% and boosting user engagement by 28%**.
- Created eight distinct routing pathways featuring seamless animated transitions using React Router and GSAP, optimizing user flow and **elevating session durations by 72%** for enhanced engagement.
- Created **reusable component architecture** that **reduced development time** for new features **by 35%**.
- Simultaneously developed a **mobile app using Flutter**, integrated with Supabase and Node.js for backend functionality.

PROJECTS

Emotion Detection Using Audio and Text

01/2025

Python, librosa, NLTK, TensorFlow, scikit-learn [Live Demo]

- Engineered multimodal emotion recognition system achieving 87 percent accuracy through combined audio signal processing and textual analysis, handling 3,000+ samples across 6 emotion categories.
- Integrated advanced NLP techniques with audio feature extraction reducing classification errors by 28percentage and enabling real-time emotion detection with sub-second response tim

WorkNear - Local Service Marketplace

06/2025 – Present

Flutter, Dart, Supabase, Node.js, PostgreSQL, REST APIs

- Constructed cross-platform mobile app connecting **100+ service providers** with customers, processing over **250 transactions monthly**.
- Implemented secure authentication system with **JWT tokens** and **email verification** that **reduced unauthorized access attempts by 94% and decreased login time by 1.2 seconds**.
 - Integrated real-time image upload with Supabase storage, optimizing file sizes by 65% while maintaining quality, resulting in **3x faster loading times and 40% reduction in bandwidth** usage.
 - Built RESTful API with 15+ endpoints achieving **99.8% uptime and average response time of 85ms**.

Photography Website

11/2024

React, Tailwind CSS, Calendly

- Built a responsive photography website using **React.js** and **Tailwind CSS** showcases the photographer's **past event albums** with a clean, modern UI. Integrated **Calendly** to allow users to book photography sessions easily. Designed with a focus on **mobile responsiveness** and smooth user experience. Ideal for events like weddings, parties, and corporate functions.
- Improved mobile **page loading speed by 53% through image optimization techniques**
 - Implemented booking system that increased client conversions by 41%
 - Developed **custom gallery view** that showcases up to **200 high-resolution images with lazy loading**

COURSES & CERTIFICATES

CS109x: Introduction to Data Science with Python  — Edx (HarvardX)

Google Associate Cloud Engineer  — Google Cloud

Java Script (Intermediate)  — HackerRank

Java- Beginner to Master  — Udemy
