Education

Velagapudi Ramakrishna Siddhartha Engineering College

2022 – Present | Vijayawada, India

B.Tech - Computer Science Engineering

CGPA - 7.76

Skills

Web-Technologies: *HTML, CSS, React*

Programming Languages: *Java, Python, C, JavaScript*

Database: PostgreSQL, Supabase, Firebase

Tools: VS Code, Git

Frameworks: Node.js, Express

Professional Experience

Software Intern

05/2025 – 07/2025 | Hybrid

Pranayuv Technologies

- Developed 5 responsive UI components with Next.js, Tailwind CSS, and Framer Motion, cutting load times by 42% and increasing engagement by 28%.
- Pioneered 3 unique UI components utilizing React Router, increasing click-through rate by 12% and enabling users to access specific information 25% faster than the original interface..
- Designed a reusable component architecture that reduced new feature development time by 35%.
- Crafted a Flutter mobile app integrated with Supabase and Node.js, delivering robust backend functionality and smooth cross-platform performance.

Projects

Emotion Detection Using Audio and Text

01/2025

Python, librosa, NLTK, TensorFlow, scikit-learn [Live Demo]

- Engineered multimodal emotion recognition system achieving 87 percent accuracy through combined audio signal processing and textual analysis, handling 3,000+ samples across 6 emotion categories.
- Integrated advanced NLP techniques with audio feature extraction reducing classification errors by 28percentage and enabling real-time emotion detection with sub-second response tim

WorkNear - Local Service Marketplace

06/2025 – Present

Flutter, Dart, Supabase, Node.js, PostgreSQL, REST APIs

- Built a cross-platform app connecting 100+ service providers with customers.
- Implemented JWT-secured authentication, reducing unauthorized logins by 94% and speeding access by 1.2s.
- Integrated real-time optimized image uploads (65% smaller, 3× faster load).
- Implemented a RESTful API achieving 99.8% uptime and 85 ms response time.

Photography Website

11/2024

React, Tailwind CSS, Calendly

- Designed a responsive photography website using React.js and Tailwind CSS to showcase event albums in a modern, elegant interface.
- Integrated Calendly for seamless session bookings, boosting client conversions by 41%.
- Optimized images to improve mobile load speed by 53%.
- Created a custom lazy-loaded gallery supporting 200 high-resolution photos.

Courses & Certificates

CS109x: Introduction to Data Science with Python 📄 — Edx (HarvardX)

Google Associate Cloud Engineer 📄 — Google Cloud

Java Script (Intermediate) 📄 — HackerRank

Java- Beginner to Master 📄 — Udemy
